SPECIAL RULES.

Freight trains must not exceed schedule time over any portion of the division except on straight track and level road, where the speed may be increased to twenty-two miles per hour when it can be made with perfect safety.

Special care must be exercised by engineers when approaching the switches in Union depot yard at Ogden. Trains must be fully under control at this point, and speed reduced to five miles per hour on entering the Union passenger station.

All trains will come to a full stop before reaching the crossing of the R. G. W. Railway at Ogden.

Freight trains will not carry passengers, except employees going to and from their work, or as provided in Rule 242.

REGISTERING STATIONS:

CARLIN, WELLS, TOANO, TERRACE, KELTON, PROMONTORY, OGDEN.

Standard clocks are located in dispatcher's office, Ogden, Promontory, Kelton, Terrace, Toano and Wells.

In pulling out of stations, brakemen must watch wheels closely to see that brakes are fully released, and will immediately signal engineers to stop when wheels are found sliding. Engineers must keep a sharp lookout for such signals, as per Rule 278. Each brakeman will be held responsible for any wheels slid flat under the part of the train in his charge. Conductors in reporting flat wheels will give name of brakeman in charge.

See Rule 84.—All west-bound trains have the absolute right of track over all trains of the same class running in the opposite direction.
